Francisco Javier Martín Fernández

Fullstack Developer

Almería, Spain | fran.j.martin04@gmail.com | energyrex.dev | github.com/energyrex | linkedin.com/in/francisco-javier-mf

Summary

Self-taught fullstack developer with hands-on experience acting as sole architect and lead developer on a production platform managing 22,000+ SKUs. Strong background in hexagonal/DDD architecture, TypeScript type-safety, and asynchronous pipeline design. Builder of a fully deployed, production-grade portfolio project (ATS platform with AI-based CV parsing). Comfortable owning systems end to end: backend, frontend, and infrastructure.

Experience

Fullstack Developer — Retelia **Sep 2025 – Present**

Almería, Spain

- Lead developer of a PIM (Product Information Management) platform managing 22,000+ SKUs, built with a hexagonal / Domain-Driven Design architecture.
- Led a full frontend refactor: reduced total lines of code by 10.3%, cut “god files” by 40%, and reduced lines of code per API file by 84% while tripling the number of supported endpoints.
- Introduced runtime schema validation with Zod (0 to 436 usages) and React Query (53 hooks), reducing manual type-guards by 56% and unsafe any casts by 36%.
- Designed asynchronous processing pipelines with BullMQ to integrate ShoppingFeed, PrestaShop, and Odoo; built a repricing module integrating directly with PcComponentes and Mediamarkt.
- Sustained authorship of over 2,100 commits, representing approximately 81% of total commits on the codebase.

Frontend Developer (Internship) — Globomatik **Mar – Jun 2025**

Vocational training internship (FCT): frontend development and PrestaShop customization

Projects

OpenATS — Self-hosted Applicant Tracking System **Personal project**

openats.energyrex.dev

- Designed and built a self-hostable ATS with CV parsing powered by vision-language models (Qwen2.5-VL, Grok API) and a weighted candidate-scoring engine.
- Hexagonal/DDD backend with three core aggregates (Candidate, JobPosting, Candidacy); JWT + RBAC authentication with Redis caching; BullMQ pipeline for CV ingestion.
- Deployed end to end to a production VPS (Hetzner) using Docker Compose, Caddy with automatic TLS, and Cloudflare DNS.

Technical Skills

Languages: TypeScript, JavaScript, PHP, HTML, CSS

Frontend: React, Next.js, React Query, Tailwind CSS

Backend: Node.js, Fastify, hexagonal architecture, Domain-Driven Design (DDD)

Data & Infrastructure: PostgreSQL, Redis, BullMQ, Docker, Caddy, nginx, Cloudflare, Amazon SES

Integrations: PrestaShop, Odoo, ShoppingFeed, Mirakl API, PcComponentes API

AI-assisted development: Ollama, xAI/Grok, VLM-based document parsing

Education

CFGS – Desarrollo de Aplicaciones Web (DAW) **2023 – 2025**

IES La Puebla, Almería

- Higher Vocational Training Certificate in Web Application Development. Final average grade: 8.5/10.
